

# Technical Information Meeting

Houston-Galveston-Brazoria  
Eight-Hour Ozone Design Values  
Emily Stashak

# Outline

- Eight-Hour Ozone trends over the most recent decade with complete years of verified data (2012-2021).
- Displaying design value trends within the Houston-Galveston-Brazoria (HGB) area at large and at the individual monitor level by both month and year.
  - Exceedance Days
  - 4<sup>th</sup> Highest Eight-Hour Ozone Values
  - Background Ozone Estimates

# Eight-Hour Design Value Trends

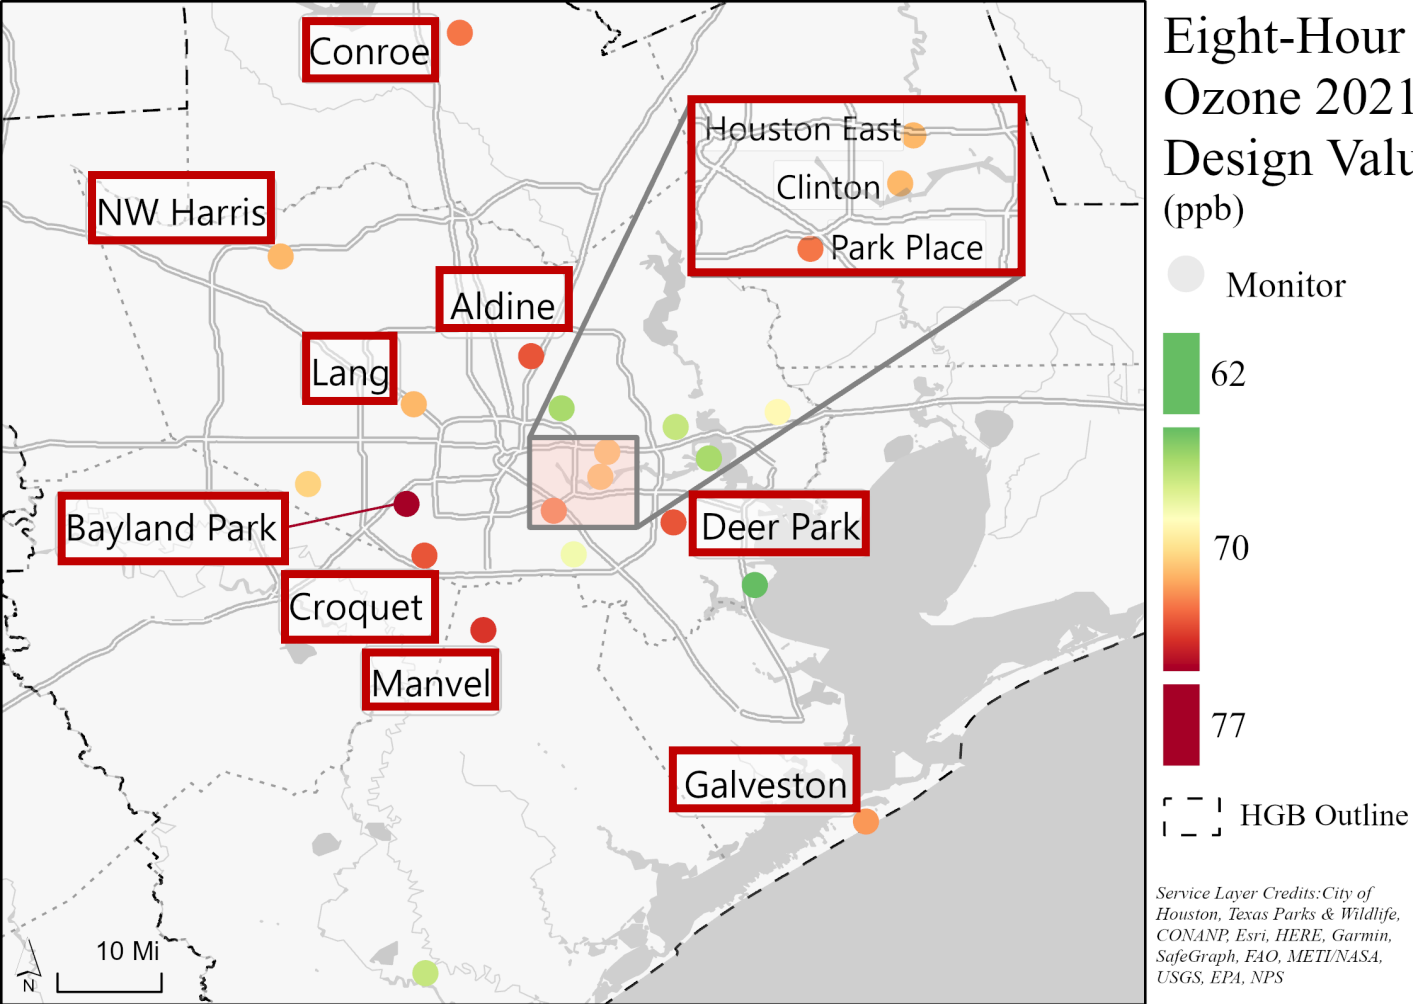

## HGB Area Design Values

## HGB Monitor Design Value Trends

# 2021 Eight-Hour Ozone Design Value Trends by Monitor

Labels generated for monitors with DVs exceeding 70 ppb

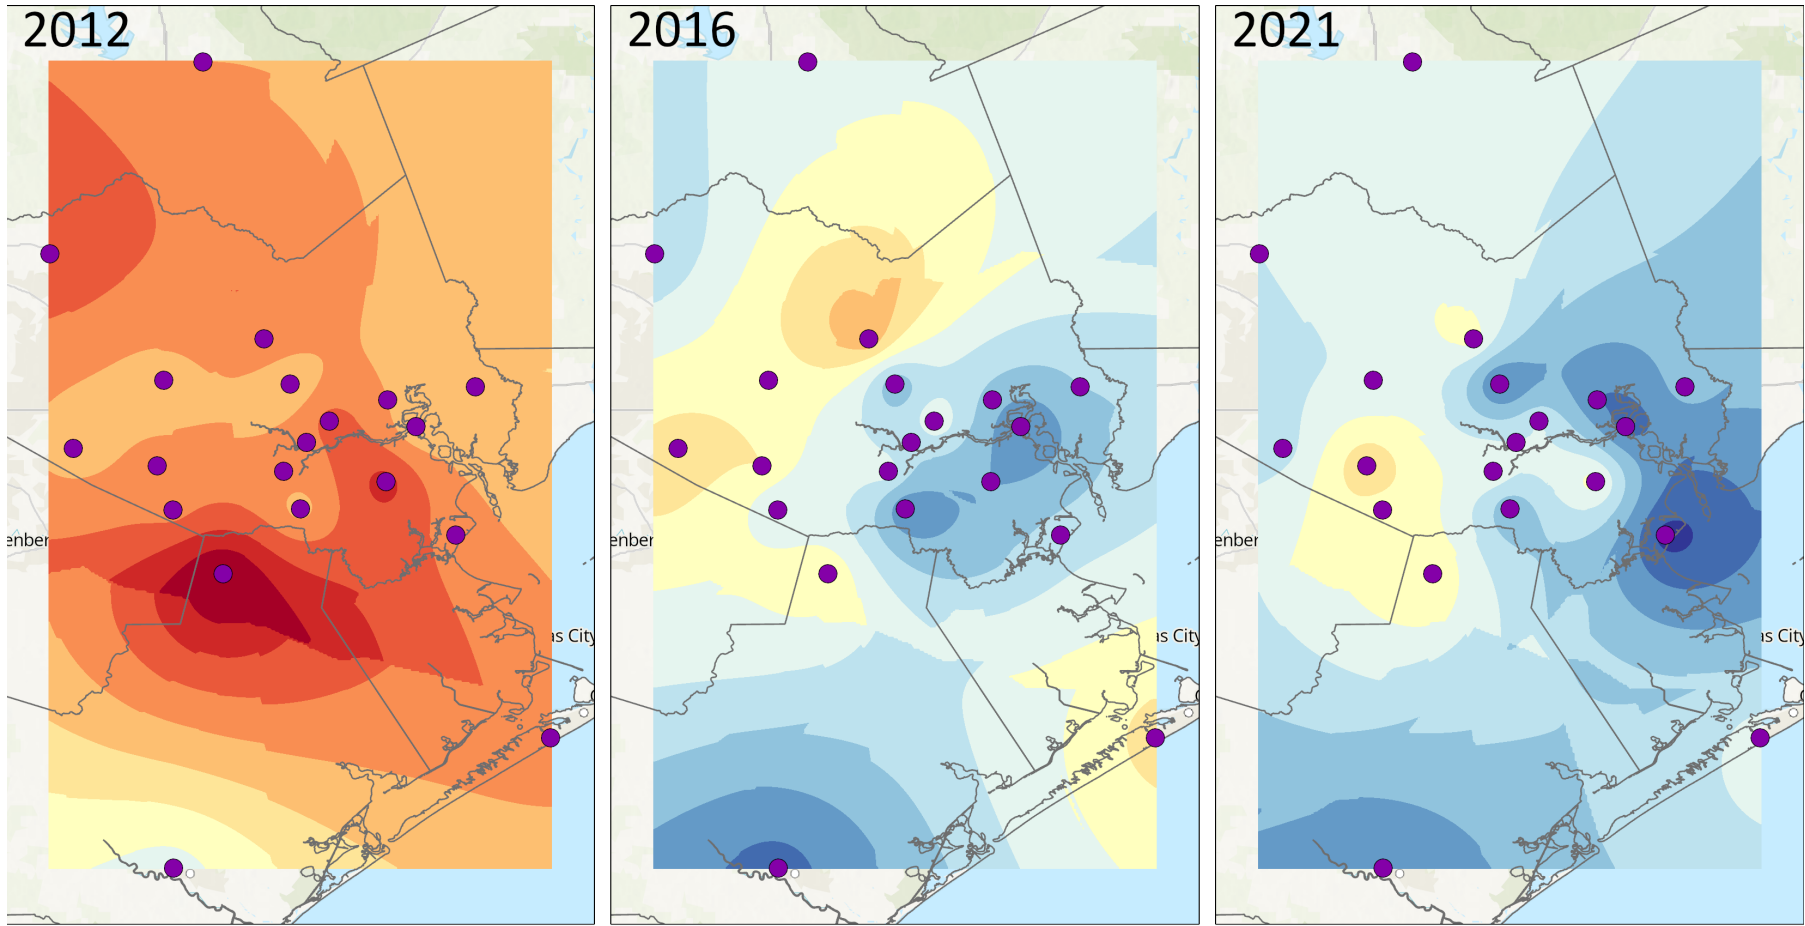

NAAQS Exceedances	Number of Monitors	Percentage of Monitors
Exceeds 1997 – 85 ppb	0	0%
Exceeds 2008 – 75 ppb	1	5%
Exceeds 2015 – 70 ppb	11	58%
Meets 2015 – 70 ppb	8	37%

# Eight-Hour Ozone DV Monitor Trends

Desian Value bv Monitor

Site Name	% Change 2012 to 2021
Bayland Park	-4%
Manvel	-15%
Aldine	-9%
Croquet	-8%
Deer Park	-12%
Park Place	-9%
Conroe	-8%
Galveston	-10%
NW Harris	-14%
Lang	-9%
Houston East	-13%
Clinton	-11%
Westhollow	-10%
Monroe	-14%
Lake Jackson	-10%
Channelview	-18%
North Wayside	-17%
Lynchburg	-17%
Seabrook	-23%

# Eight-Hour Ozone Design Value Heat Maps

Ordinary kriging method applied to interpolate ozone DVs in areas without monitors utilizing three years of data per map generated.

City of Houston, Texas Parks & Wildlife, CONANP, Esri, HERE, Garmin, FAO, NOAA, USGS, EPA, NPS, Esri, USGS

# Ozone Season Eight-Hour Ozone Exceedance Day Trends

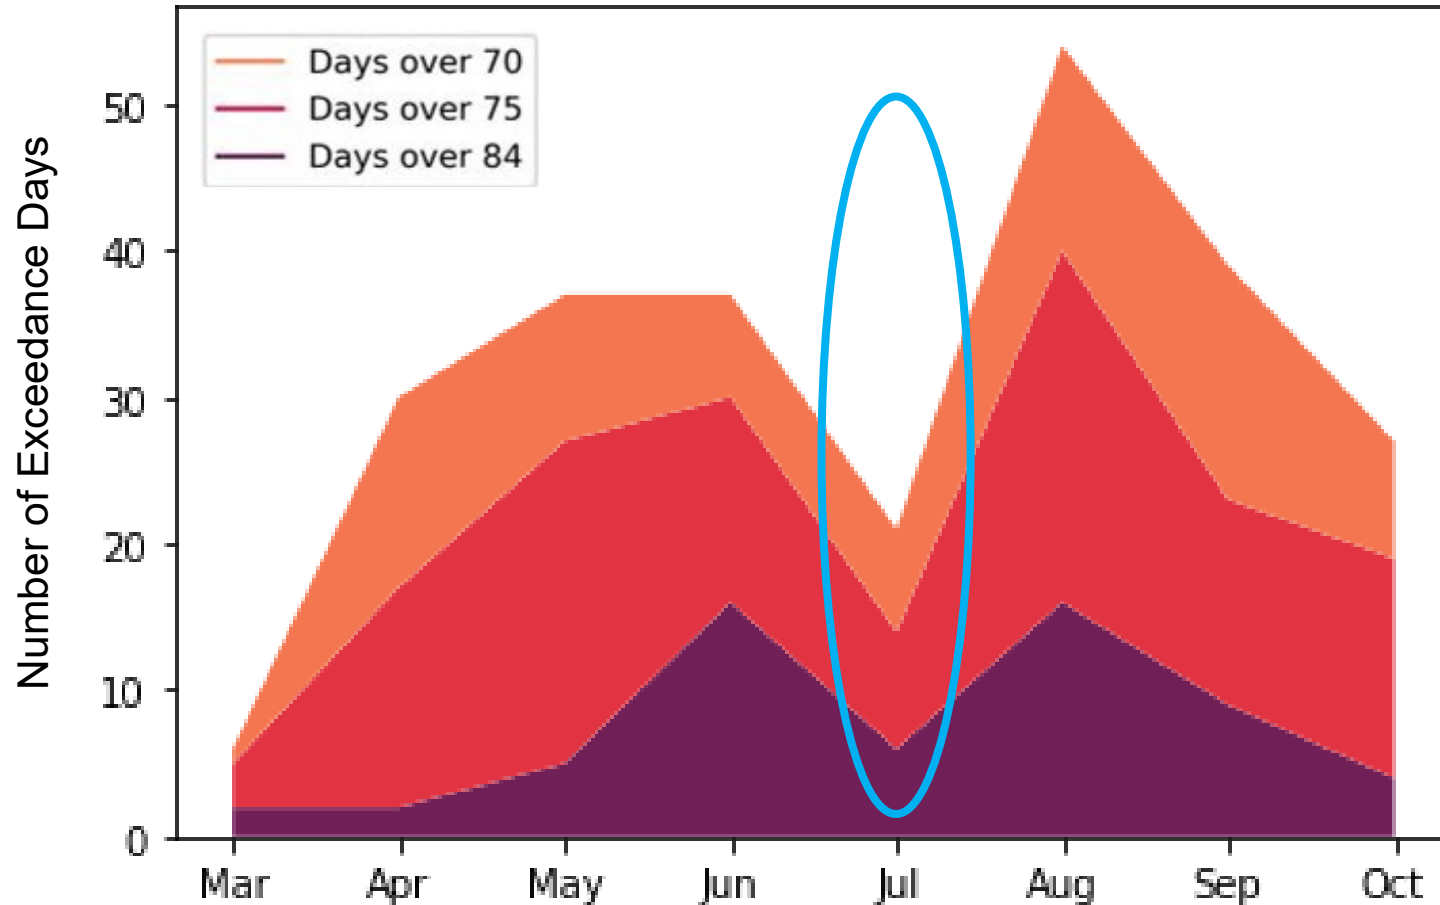

Number of High Ozone Days by NAAQS Standard from 2012-2021

NAAQS Standard	Percent Change 2012-2021
Days > 70	- 40%
Days > 75	- 47%
Days > 84	- 29%

# Ozone Season Eight-Hour Ozone Exceedance Day Trends

Number of Exceedance Days by Month 2012- 2021

- The month of July typically has fewer exceedance days than other summer months. This is generally attributed to the impacts of a high-pressure system, the Bermuda High. The impacts of this system on local meteorology vary annually.

1997  
NAAQS  
85 ppb

2008  
NAAQS  
75 ppb

# Ozone Season Eight-Hour Ozone Exceedance Heatmap Calendars

2015 NAAQS 70 ppb

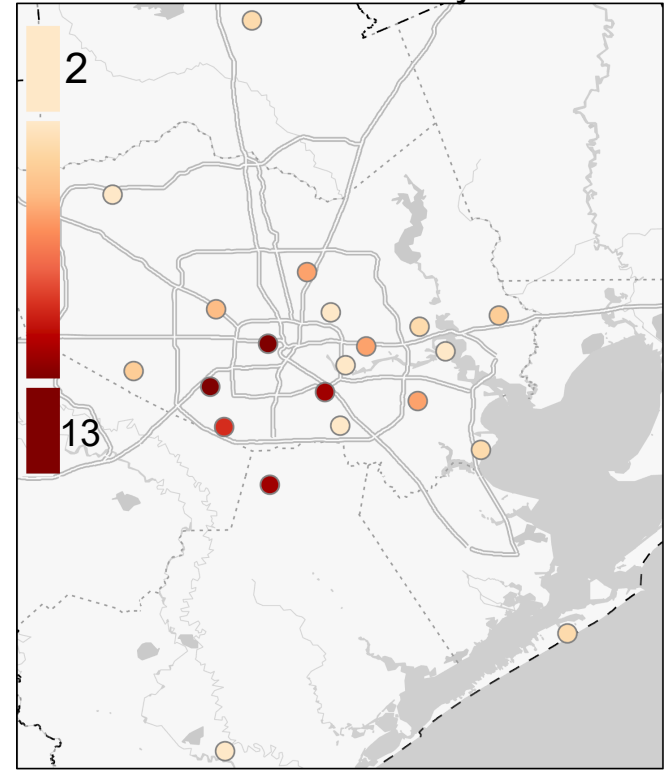

# Eight-Hour Ozone Exceedance Days (70 ppb) by Monitor

Number of Exceedances by Monitor

2021 Exceedances by Monitor

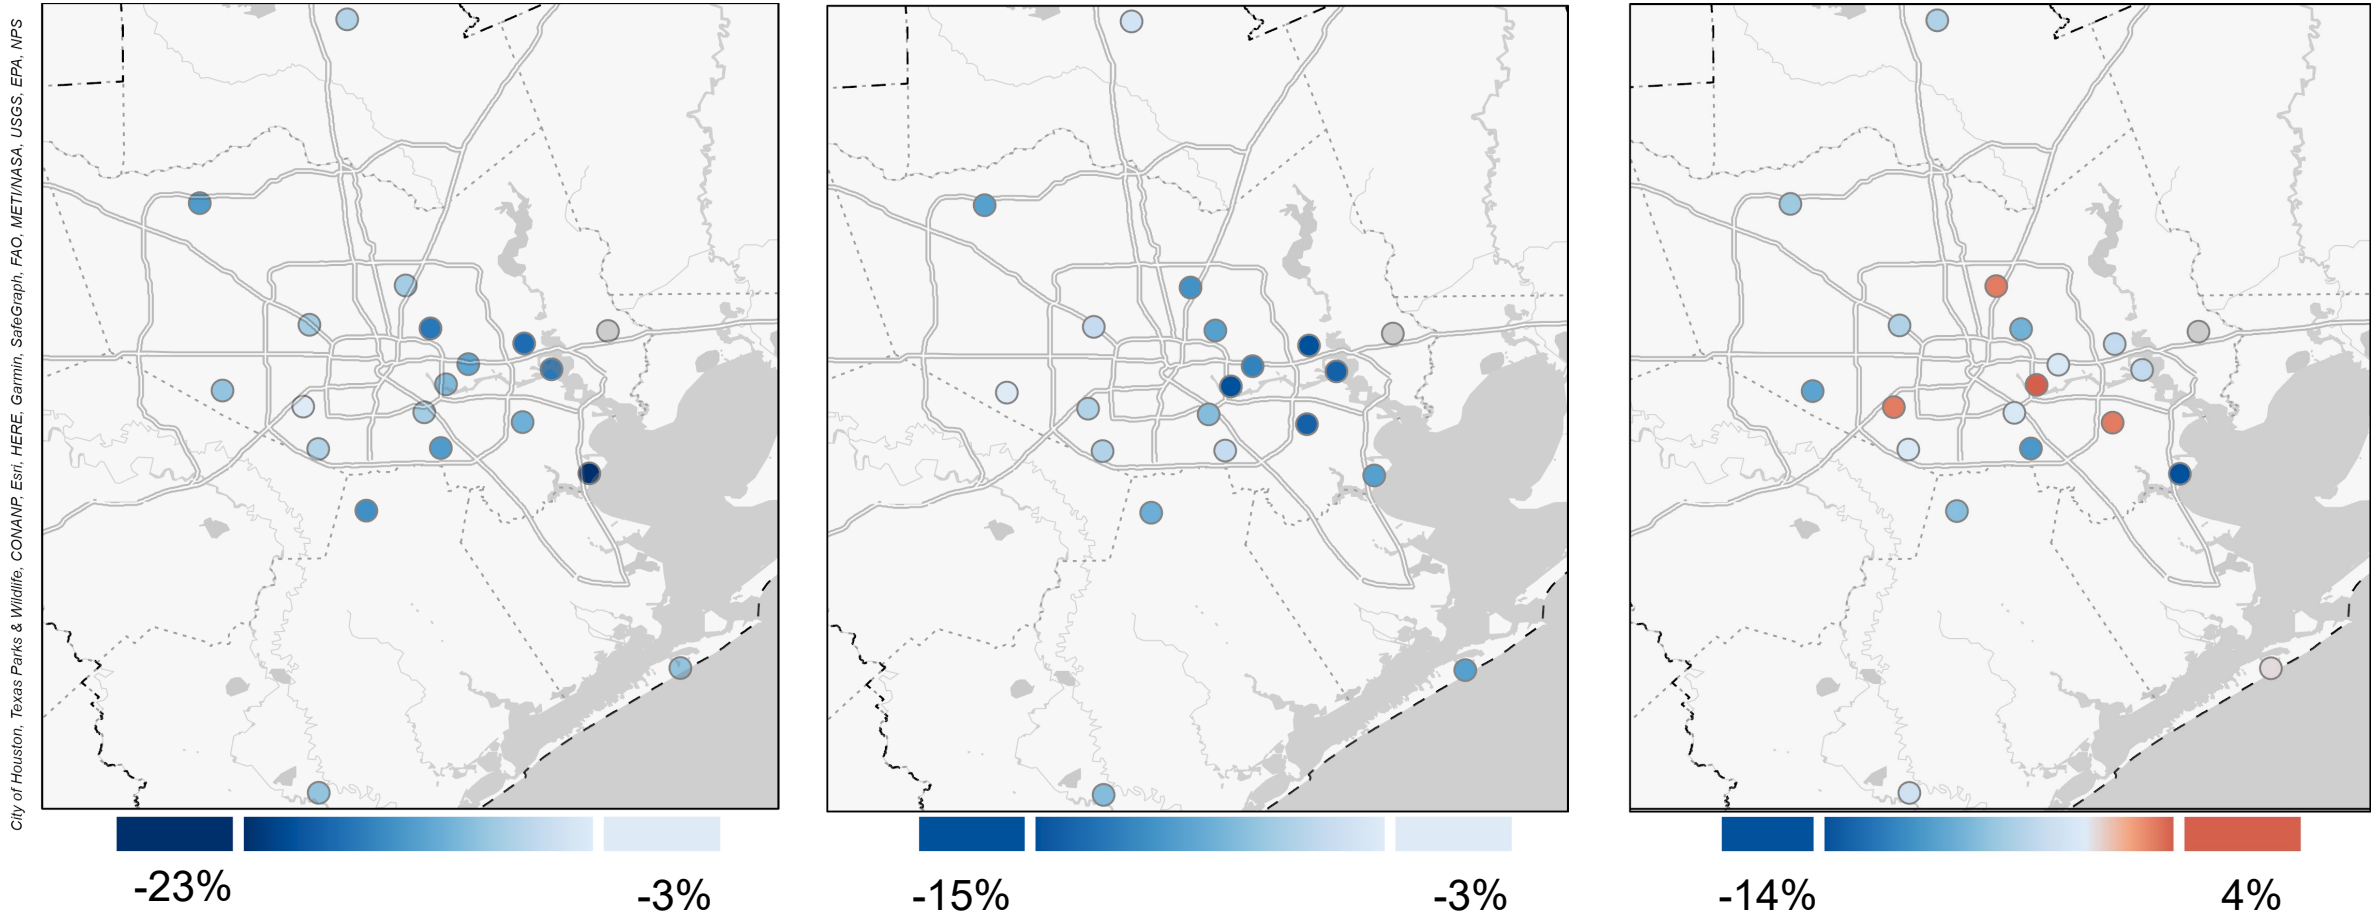

City of Houston, Texas Parks & Wildlife, CONANP, Esri, HERE, Garmin, SafeGraph, FAO, METI/ NASA, USGS, EPA, NPS

# Percent Change of Exceedance Days by Monitor

2012-2021

2012-2014

2014-2021

# Eight-Hour Ozone 4<sup>th</sup> Highs

4th Highest Ozone by Year

4th Highest Ozone Stats (All Days)

# Ozone Season Background Ozone Comparison

## Low Ozone < 70 ppb

Daily Max with Background Levels  
Low Ozone Days

## High Ozone $\geq$ 70 ppb

Daily Max with Background Levels  
High Ozone Days

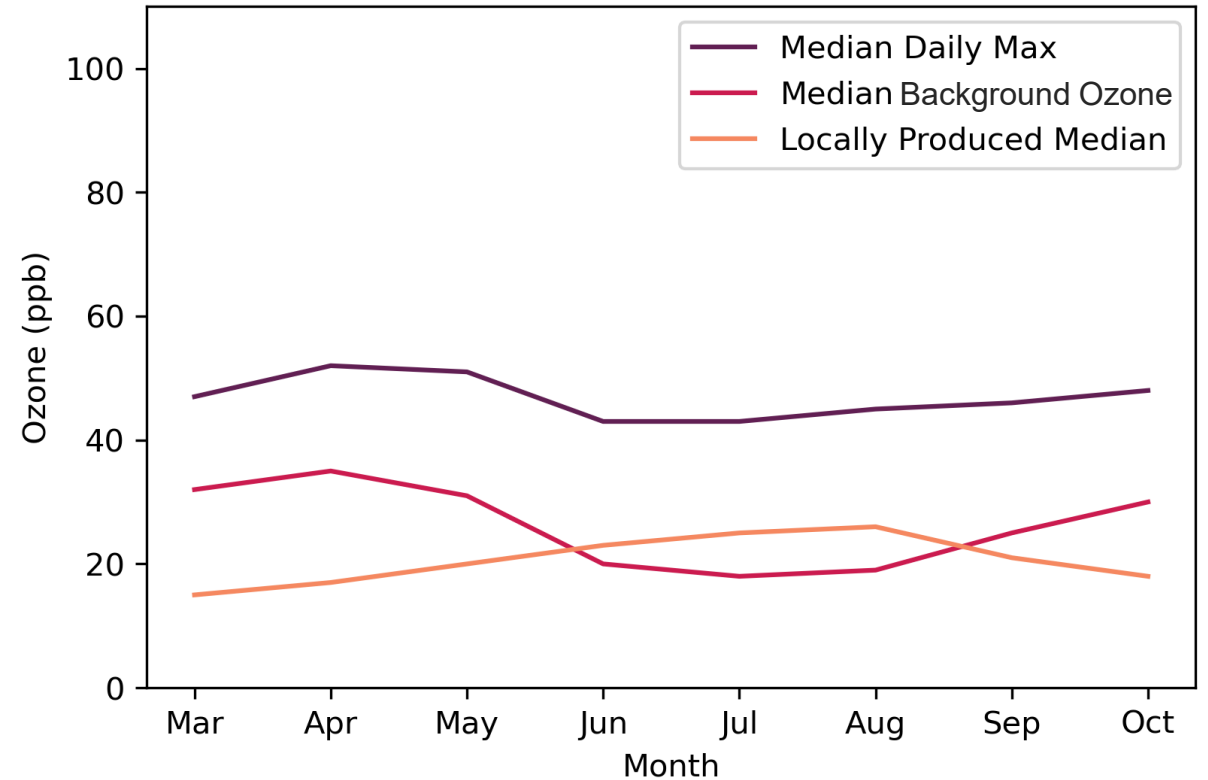

# Daily Maximum Eight-Hour Ozone & Background Ozone Trends

Daily Max Ozone by Month (Averaged from 2012-2021)  
High Ozone Days

Daily Max Ozone by Month (Averaged from 2012-2021)  
Low Ozone Days

# Summary

- Design value trends from 2012-2021 have decreased.
- The largest percentage of the decrease in design value trends is concentrated between 2012-2014, as 2014 recorded the lowest number of exceedances compared to any other year.
- From 2014-2021 design values trends for the HGB area have not significantly increased or decreased.

# Questions?
